## WORK EXPERIENCE

---

Credit Card Defaulters Classification and Prediction Remote

Data Scientist (Freelance Contract) April 2022 – May 2022

- Built a system that helped to formulate strategies and make better informed decisions on new applications of credit cards through machine learning recommendations
  - Showcased company's customer features from the result of deep data analysis on the defaulters' data using standard data quality control and analytical techniques
  - Built machine learning models for predicting defaulters with an accuracy score of more than 80%
- 

Breast Cancer Classification Using Deep Learning Remote

Data Scientist (Freelance Contract) March 2022 – April 2022

- Built a system for the classification of breast cancer images into cancerous cells and non-cancerous cells
  - Utilized machine learning models in conjunction with transfer learning models specifically the VGG19, EfficientNetV2L and InceptionResNetV2 models
  - Optimized the best performing model to predict with a high metric score of 94%
- 

Topic Modelling For Social Computing Task Remote

Data Scientist (Freelance Contract) March 2022 – March 2022

- Built algorithms for auto-processing social media tweets into groups
  - Utilized python's natural language processing (NLP) libraries in conjunction with topic modelling techniques such as LDA and LSA to analyze and build a classification system
  - Produced highly accurate results of above 91% accuracy in successful grouping of the tweets
- 

Computer Vision Image Manipulation Task Remote

Data Scientist (Freelance Contract) December 2021 – December 2021

- Built a system to produce custom thresholding of images using an exclusive mode of image manipulation techniques
  - Utilized python image libraries such as OpenCV, matplotlib, skimage, SciPy and more, in performing the custom image manipulation
  - Generated output images using the custom thresholding feature which were very similar to OpenCV's standard thresholding feature with an accuracy of nearly 95%
- 

Rocks Classification Project Remote

Data Scientist (Freelance Contract) November 2021 – December 2021

- Built a multi-class prediction system for classifying rocks into the appropriate type
- Built machine learning models such as GaussianNaiveBayes and DecisionTreeClassifier for the prediction of the rocks data into the right categories
- Optimized the best performing model to predict with a high metric score of 91%

Hamoye AI Labs

Full-Time Remote

Data Scientist

July 2021 – November 2021

- Built and presented solutions using machine learning models to produce faster insights into data that other companies can use to make more informed decisions
- Collaborated with a team of 23 members to analyze and build machine learning models specific to Covid-19 patients and Airplane accidents
- Built several machine learning models for prediction with accuracy scores of more than 80%

## LEADERSHIP AND VOLUNTEERING EXPERIENCE

Professionals In Data

Remote

Team Lead (Volunteer)

July 2022 – Present

- Train aspiring data scientists and data analysts by providing mentorship and also leading group projects
- Past projects include ‘Sentiment Analysis of Elon Musk’s tweets: The effect on Tesla’s stocks’, and ‘Human vs Machine-based Analysis: What affects the gross profit of IMDB’s top rated 1000 movies?’

## EDUCATION

University Of Ilorin

Kwara, Nigeria

Electrical/Electronics Engineering

October 2016 - February 2022

## SKILLS & LANGUAGES

Technical Skills: SQL, Python, NumPy, SciPy, Pandas, Scikit-learn, Machine Learning, Matplotlib, Seaborn, Panel, hvplot, holoviews, Data Visualization & Storytelling, Excel, Tableau, Data Manipulation and Analysis, OpenCV, Computer Vision, Google DialogFlow, Natural Language Toolkit (NLTK), Deap, TensorFlow, Keras, Natural Language Processing (NLP), Artificial Intelligence, Git, Github, API Integration

Soft Skills: Problem Solving, Effective Communication, Teamwork, Time Management, Leadership

Languages: English, French, Arabic, Yoruba
